

## Instructions

1. Make sure to have tensorflow 2.0 >= installed. Install sklearn, numpy , matplotlib.
2. Extract the zip file. Go to the code folder and open the code in google colab.
3. The Food-5k zip file must be uploaded on google drive for reading the dataset.
4. Once the dataset has been uploaded on google drive, run each cell of the notebook to display the results.
5. If the tensor board does not display, run the notebook in firefox browser.
